

Educational Opportunities with CMS

The Colorado Mammography Society holds educational conferences or seminars every year. Conferences are held in different areas of the state to accommodate all of our memberships' needs.

Complete information about these conferences is sent to our members first in the newsletter. After our membership has a chance to review and register for the conferences, the information and registration form will be posted here.

For each conference, we have presentations from speakers that may be local or nationally known personalities. We have even had a few that were quite humorous! Each conference is generally approved for 5 CE points specific to mammography (as each conference is evaluated individually for CE points, we do not guarantee the number of points or that they will suffice for MQSA requirements
